

**PORTABLE GPU FOR HELICOPTER / AIRCRAFT**

**Specifications**

Outputs : 3KVA, 400Hz, 3Ph. AC  
 : 28V / 70A Continuous DC  
 Can give starting current upto 1200A.

**GPU FOR AN-32 AIRCRAFT**

**Specifications**

Output Power : 90KVA  
 Outputs : 28V DC, 10KW  
 : 115V, 400Hz AC, 12KW  
 : 0-70V variable DC to start ADI-20 Engine directly from GPU.

(This GPU is replacement to *Russian APA unit* and can be modified for MIG-BIS Aircraft also on request.)

**SELF DRIVEN DC GPU**

**Specifications**

Output : 28V DC @ 12kW continuous  
 : upto 1500A starting  
 Light weight and electric vehicle mounted.

**40KVA GPU**

**Specifications**

Outputs : 400Hz, 3Ph. AC  
 : 28V DC for engine starting  
 : Aux. supply.  
 Suitable for SU-30 MKI, JAGUAR, MIRAJ, IL-76 / 78, Helicopters etc.

**60KVA GPU FOR MIG-BIS**

**Specifications**

Outputs : 400Hz, 3 Ph. AC  
 : 28V / 56V DC and 3kW Aux.  
 Suitable for MIG-BIS & wide range of aircrafts needing AC or DC or both.

**ALTERNATOR LOAD BANK / TESTING EQUIPMENT**

**Specifications**

Rating : upto 400KVA  
 Resistive & Inductive loading  
 Regenerative Alternator Testing

**DC RECTIFIER**

**Specifications**

Input : 415V ± 15%, 3ph., 50Hz  
 Outputs : 150A / 300A / 600A / 1000A  
 : 700A / 1200A / 1500A / 2000A for short duration  
 Low ripple DC output for Aircraft testing and starting.

**FREQUENCY CONVERTER**

**Specifications**

Output : 60Hz, 400Hz  
 Output Power : From 5kVA to 140KVA  
 Both Static & Rotary Frequency Converters available for Aircraft testing.
